

FIG. 1

This diagram shows a cross-section of a patient's back 14. A medical device assembly 60 is positioned on the back. It consists of a large, dome-shaped upper portion 55 and a lower base unit 56, which are connected by a flexible tube 58. A cable 61 originates from the base unit 56, passes through a hole 82 in the skin of the back, and terminates at a connector or plug 83. An arrow labeled "SEE FIG. 2" points towards the connector 83. Other labels include 70a, 70, 67, 69, 79, 85, 84, 80, and 81.
